

Fapas® QC MATERIAL DATA SHEET	T29116QC
Matrix	Fish
Weight / Volume of Contents	10g

Fish Identity	Percentage of labs which satisfactorily identified specific fish %
Yellowfin Tuna (Thunnus albacares)	92

This data sheet is applicable until	29 Dec 2028
Recommended Storage on receipt	-20°C

Notes
<ul style="list-style-type: none">• Mix the QC material thoroughly before taking a representative analytical sample.• The designation has been derived from the consensus of laboratories taking part in the accompanying proficiency test, using a variety of methods. This is not a certified reference value.• Stability of the QC material has been established as sufficient for the scope of the proficiency test from previous experience, expert advice and published literature. Fapas® advises that the QC material is analysed within the recommended date. Fapas® QC materials are intended to be used as single-analysis samples.• Full details on the proficiency test procedure used to characterise this QC material are available in the Protocol, Part 1 - Common Principles, freely available to download from the Fapas® website.
